

## Year 6 Unit 9 Activity Sheet Answers

We can add and subtract whole numbers and decimals using efficient written methods

Set these out carefully and calculate the answers. Remember that the decimal points must be vertically in line with each other. Estimating is always useful in calculations like this as it will help you check that you have written it down correctly.

$$3.27 + 6.9 = 10.17$$

$$9.3 + 6 + 5.55 = 20.85$$

$$3 + 45 + 4.56 = 52.56$$

$$44.5 - 2.9 = 41.6$$

$$28.41 - 5.7 = 22.71$$

$$4.06 - 1.93 = 2.13$$

$$3.58 + 0.06 + 47 = 50.64$$
